(a) threshold and stability atlas
hospital capacity b (log scale)
transmission parameter $\mathcal{B}$
b_{trans} (certified)
b_{trans}, v1.0 search on $\tau \le 100$ (erroneous)
b_{crit}
b_H (subcritical Hopf)
b_{LPC}^{-} (fold, simulation bracket)
b_{LPC}^{+} (fold, simulation bracket)
transient-overload band
unstable capacity equilibrium
$R_0 = 1$
(b) threshold separation and initial-condition dependence
$b_{\mathrm{trans}}/b_{\mathrm{crit}}$
transmission parameter $\mathcal{B}$
baseline seed $i(0) = 10^{-6}$
