
(a) $b = 1.5 \times 10^{-4}$, inside $(b_{\mathrm{LPC}}^{-}, b_H)$
start near equilibrium
start on large cycle
waiting class q
time τ
(b) $b = 1.5 \times 10^{-3}$, inside $(b_{\mathrm{crit}}, b_{\mathrm{LPC}}^{+})$
start near equilibrium
start on large cycle
waiting class q
time τ
(c) basin slice: green → equilibrium, red → cycle
attracting cycle
stable equilibrium
Σ
initial h
initial q
(d) basin slice: green → equilibrium, red → cycle
attracting cycle
stable equilibrium
Σ
initial h
initial q
